Chikuwa

In Kama fresh sea Takachima
there is take chikuwa (literally bamboo chikuwa)
which is eaten on the bamboo after it is broiled

Chikuwa is a Japanese tube-like
food product made from
ingredients such as fish surimi,
salt, sugar, starch, monosodium
glutamate and egg white. After
mixing them well, they are
wrapped around a bamboo or
metal stick and steamed or
broiled. The word chikuwa
(bamboo ring) comes from
the shape when it is sliced.
